

ON THE DECK

COMPOSITE DECKING PORTFOLIO

Fiberon believes decks are meant to be enjoyed, not maintained, and that’s why their products wont warp, rot, or splinter; so, the look you love today will be there tomorrow.

Since 1997, Fiberon has been manufacturing and selling high-quality composite decking products designed to make outdoor living easy, their introduction of a 25-year stain and fade warranty was an industry's first.

What makes Fiberon products even better is that they are made from recycled materials, free of harmful chemicals, produced using sustainable processes and a state of the art closed-loop water cooling system for zero water discharge and the recovery of 98.5% of the waste materials generated; this all contributing toward points in LEED and other green building rating systems.

GOOD LIFE RANGE

Fiberon Good Life Composite Decking is perfect for hosting neighbourhood gatherings, enjoying a summer dinner with your family or relaxing outside after a long week, Good Life offers unbeatable performance and durability, at a reasonable price point for a premium decking material, making it a great choice for any project.

 Standard Length: 4.88m
 Joist Spacing: 300 CTC

FEATURES & BENEFITS

- 25 year *Weekender Collection
- 30 year *Escapes Collection
- 10 year commercial warranty
- Superior Anti slip
- Distinct grain patterns.
- Low maintenance
- 96% recycled content.

More than 30 years of experience separates MoistureShield from other manufacturers in the industry. MoistureShield's proprietary Solid Core Difference™ is at the heart of every decking board produced and makes it the only wood plastic composite decking board that can be installed on the ground, in the ground and underwater.

This innovation creates an impermeable barrier that fights against damage from moisture, rot, insects, and other harmful elements — all day, every day. Peace of mind is imperative for clients peace of mind, and MoistureShield offers all of this with the integrity of every board's solid core, even after ripping and cutting, mitigating warranty issues and long term damage.

MOISTURESHIELD VISION

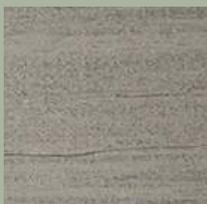

Even more innovative than their Solid Core, MoistureShield Vision is the strongest capped wood composite board, protected with their exclusive, advanced technology surface capping and coating, DiamondDefense™ technology, a liquid polymer coating creates the strongest capped wood composite board on the market to help you prevent damage from scratching and impact.

MoistureShield also created, the groundbreaking CoolDeck® Technology that helps reduce heat absorption by up to 35%*, available in a select curated colour options within the Vision Range, now full sun decks that can't be enjoyed because of the heat are a thing of the past.

SPECIFICATIONS

Product Profiles: Grooved & Solid
 Dimensions: 137 x 25mm
 Standard Length: 4.9m
 Joist Spacing: 350 CTC

FEATURE'S & BENEFITS

- CoolDeck® Technology up to 35% cooler
- DiamondDefence™ coating technology
- Stain Resistant
- 25 Year Limited Warranty
- Minimal expansion and contraction.

A fairly young newcomer into the wood composite decking industry, Deckorators' originally started as an aluminium balustrading company focusing on the possibilities to enhance and design more than just a deck for outdoor entertainment areas. It didn't take them long to integrate wood composite decking to their repertoire and expansion into other deck design-element products ; but they didn't stop there.

Pioneering the technology in developing mineral-based composite decking with Eovations™ technology. This patented technology gives mineral based composite an unmatched combination of light weight, strength, and stability.

VENTURE RANGE

Deckorators® Venture Decking is a wood-plastic composite deck board that offers the best combination of value and performance and is strong and highly functional as it is attractive. A decking board that is smartly engineered, made of top-quality materials, and durably coated for greater protection against the elements, assuring year after year of lasting beauty with minimal care.

Featuring a natural woodgrain in two classic yet modern colours; it is a composite decking range that is low maintenance back by an extraordinary warranty.

Joist Spacing: 300 CTC

BENEFITS & FEATURES

- Stain Resistant
- Fade Resistant
- Low Maintenance
- Scratch-resistant
- 25-year limited warranty

Trex became the worlds #1 composite decking brand by offering the industries widest array of high - performance composite products and their availability in more than 40 different countries around the world.

It all started in 1996 originally from a buy out and then in 1999 Trex went public. Throughout the years Trex has added complimentary decking products to their offering and kept improving on their original products – expanding their portfolio shows their commitment to performance, beauty and reliability.

TREX ENHANCE

Producing a product that encompasses 3 key factors that purchasers look for aesthetics, performance, and affordability. And Trex Enhance offers an authentic wood-grain appearance with the durability of composite and the affordability of wood, ticking all the blocks. A decking profile that is an authentic wood-grain appearance with the durability of composite and the affordability of wood.

Manufactured in a scalloped profile, making it as lightweight as timber but without the extra work long term, this long-lasting decking requires little upkeep.

Joist Spacing: 300 CTC

BENEFITS & FEATURES

- Fade Resistance
- Stain Resistance
- 25 Year Limited Warranty
- Capped Board
- Scalloped Profile
- Multitonal *Naturals
- Mono Chromatic *Basics

One of the original brands to enter the South African market, maintaining a consistent product that serves to fill a crucial gap in the market between, high maintenance timber and pricier premium luxury wood composites. Envirodeck has stood the test of time and proved its reliability to its clients in the industry.

Refining the original products and diversifying into complementary composite products has kept Envirodeck in the market and on trend in a very competitive industry.

ENVIRODECK IMPRESSION RANGE

The original revised and reimagined – still the best value for money when a composite it insisted upon. The Impression range is a first generation, uncapped wood composite decking board, available in 2 profiles and 3 distinct finishes and 4 distinct colour options.

In an effort to ensure the best purchasing value Envirodeck Impression Range kept the original Solid Profile, and re-engineered the original into a Lite Arched subdivision, working from an economical point of view, but maintaining the performance qualities, an arched underside reduces material costs without sacrificing the aesthetic or the strength and stability it is renowned for.

- Solid = Solid Profile
- Lite Arched = Arched Underside
- Durable Use
- Stain Resistant
- Wood Look Finish *Lite Arched
- 95% Recycled Product
- Uncapped

IMPACT CAPPED RANGE

Making something good even better, the Impact Range was developed to keep Envirodeck on par with the movements in the market for a protective capped decking board, but at the same time, keeping the costs still within reach to the average consumer.

Designed with a distinct wood grain embossing, multidimensional colouring, the Impact Range provides possibilities for all projects with 4 colour options.

When developing the Impact range, a trend in the market was identified and a matching fluted cladding panel was put into the portfolio. These panels are beautifully modern but classic and can be used externally to flatter not only your decking but your entire outdoor space; or use them internally as a striking feature.
